

## How to make money online

By Max Williams

<https://maxprosite.com/>

There are several ways to make money online today. You can start a blog post and write about a product or service that you use, and then provide a link online for people to click on to go and buy the product. Once the product is bought, then you get a commission from the organization that produces the product or service.

You get paid by joining the organization's (usually a business) affiliate and or referral program were you fill out a form with your information such as your full name, your website address, how you will be paid (either through a assigned link you put on your website, or an assigned code that you give to the customer who turns it in when they buy the product).

The above example is done in various ways whether again you either write about the product or service, or create a video about the product/service and then provide the link, or just refer people directly to the website with your code that you got from the organization/business you sent the customer to, and once they buy the product or during the process, they turn in your code that you gave them, and you get paid.

There are also click sites also, but that subject is not what we are going to talk about today.

I'd like to present to you my referral / affiliate program. I have a service were I build websites and online web stores. You can get paid if you refer people to my website for the service of either to build a website, or build a E-Commerce site and if and when the referral actually pays for the service, you get paid (\$5 goes to you if the referral buys a website, and \$10 goes to you if the referral buys a E-Commerce Store).

You just need a email address and a PayPal account (so that I can pay you your commission).

ANYONE can do this, from anywhere in the world, anytime you want.

You don't need a blog, website, or video to advertise on, just refer my service to the potential customer, and MAKE SURE, they mention that you referred them when they communicate with me, either by phone, email, text, or video conference, and if they use my service, you get paid.

Refer the customer to my site -

<https://maxprosite.com/>

then tell them to go to the "Digital Store" for details. It's THAT simple, it's THAT easy.

If you have further questions or concerns, contact me at the same site
